Sodium Hyaluronate 0.4% Eye Drops — Soothing & Moisturizing

Composition — Sodium hyaluronate, polyhexanide, sodium chloride BP and phosphate buffer; clear isotonic solution in presterilised bottles.

Indications — Irritation, itchiness and discomfort from continuous computer/TV use, pollution or dry environments. Adults and children above 12 years.

Directions — Wash hands; check the tamper-evident ring before first use. Instil one or two drops into each eye as required. Blink several times; recap tightly.

OMSEMoist 20 ml · Sterile A

Fresh Eye Drops — Soothes and Comforts

Description — Refreshing sterile drops that soothe and comfort tired, dry or irritated eyes.

Indications — Everyday relief of mild dryness and eye fatigue. For external use only.

Directions — Instil one or two drops into each eye as required or as directed by an eye care practitioner.

OMSEHydra 10 ml · External use only

Hypromellose Ophthalmic Solution USP — Eye Drops

Composition — Hypromellose USP 0.3% w/v (hydroxypropyl methylcellulose) in sterile aqueous base q.s.

Indications — Lubrication of dry, irritated eyes. Dose as directed by physician.

Directions — Use within one month of opening the bottle. Store below 30 °C. Not for injection.

OMSE Refresh Sterile

Hypromellose Eye Wash — Soothes & Refreshes

Description — Gentle hypromellose eye wash that soothes and refreshes irritated eyes.

Indications — Rinsing and refreshing eyes exposed to dust, smoke or dry air.

Directions — Use to bathe the eye as required or as directed by an eye care practitioner.

OMSENaturale 10 ml · Sterile A · CE 2460

Natural Soothing Eye Drops — Chamomile & Euphrasia

Composition — Chamomile extract, euphrasia extract, polyhexamethylene biguanide (0.0001%), disodium edetate (0.12%) in a buffered saline solution.

Indications — Natural soothing relief for tired, irritated eyes. Keep out of reach of children.

Directions — Instil one or two drops into each eye when required. Blink several times; replace the cap tightly after use.

OMSEBreathe 10 ml · MD · CE 2460

Nasal Spray — For the Whole Family

Composition — Sodium chloride 0.9% w/v — normal saline.

Indications — Gentle cleansing and moisturising of nasal passages; suitable for daily family use.

Directions — Spray once or twice into each nostril as required. Clean the nozzle after each use.

OMSEVista 50 ml

Spectacle Lens Cleaning Solution with Fragrance

Composition — Isopropyl alcohol (70%).

Indications — Streak-free cleaning of spectacle lenses and optical surfaces.

Directions — Spray lightly onto both lens surfaces and wipe with a clean microfiber cloth.

About Lensea Pharma

Lensea Pharma is an Abu Dhabi-based supplier of sterile ophthalmic, lens care and wellness products. Every product in our range is CE marked (2460) and manufactured under internationally certified quality systems, and distributed to pharmacies, optical retailers and eye care professionals across the region.
